Experience

Automation Intern

Jan 2026 - Present

UBS

Mumbai, India

- Constructed a Python-based automation pipeline aggregating 10+ Excel sources into 8-sheet structured reports, reducing manual effort by 30+ hours
- Formulated modular OOP workflows using Pandas, NumPy, and Openpyxl for data ingestion, validation, and transformation with robust error handling; introduced real-time logging for non-technical usability.
- Launched a Streamlit frontend to simplify interaction and prototyped an AI-driven chatbot for automated output analysis; assembled Power BI dashboards for visualization.

Software Development Intern | Link

Jun 2025 - Jul 2025

NIIT Managed Training Services

Gurugram, India

- Created a full-stack user management system using React, Node/Express, PostgreSQL, and JWT authentication.
- Deployed the application on Vercel - cloud backend, refining database queries to achieve sub-800ms response times.

Projects

Smart Stick for the Visually Impaired | Link | *Arduino, ML, Computer Vision*

Dec 2024 – Apr 2025

- Engineered an Arduino-based assistive device integrating ultrasonic sensors, GPS navigation, and camera-based object detection with haptic feedback.
- Devised ML-driven path optimization using Google Maps APIs to avoid crime, accident, and traffic hotspots, with SOS alerts triggered on anomalies or unfamiliar faces.

AI-Based Frame Interpolation for WMS Services | Link | *Python, ConvLSTM*

Sep 2024 – Dec 2024

- Designed an end-to-end ML pipeline for frame interpolation to generate smooth satellite imagery videos for WMS platforms, enhancing temporal resolution of cloud movement visualizations.
- Integrated environmental parameters (wind, pressure, temperature) into a ConvLSTM model with a custom loss function to improve prediction of deformable patterns like cyclones.

Saavdhaan – Crime Hotspot Detection | Link | *Python, REST APIs, GeoPandas*

Nov 2023 – Dec 2023

- Analyzed 15K+ crime records using clustering models (DBSCAN/KMeans) to identify hotspots with 80% accuracy; Streamlined ETL pipelines and indexing, reducing query times by 40%.
- Deployed geofencing alerts (500m radius) and safer route recommendation algorithms for end-users.

Education

Vellore Institute of Technology, Chennai Campus

Sep 2022 - Jul 2026

B.Tech in Computer Science (Specialization: AI and Robotics)

CGPA: 8.81

Skills

Languages: Python, Java, C/C++, JavaScript, SQL, Dart

Frameworks: React, Node.js, Express, Flask, Flutter, TensorFlow, PyTorch

Databases/Cloud: PostgreSQL, MongoDB, Firebase, AWS, GCP, OCI, Vercel

Tools: Git, Linux, Docker, REST APIs, Postman, Figma, CI/CD

Core: Data Structures & Algorithms, OOP, Networking (TCP/IP, HTTP), System Design Basics, ML Pipelines

Leadership Experience

President, Dramatics Club

May 2024 - May 2025

Vellore Institute of Technology, Chennai

Chennai, India

- Led 50+ members across 10+ large-scale performances, attracting 1K+ attendees and fostering collaboration.
- Streamlined logistics and budgeting workflows, reducing prep cycles by 50% and boosting workshop participation.
- Directed and scripted plays winning national accolades across IIT Madras, IIT Bombay, and VIT campuses.

Achievements

- Top 5 National Team**, Hackout 2023 (IIT Madras); **Smart India Hackathon 2023 & 2024** (top 1%).
- Solved **400+ LeetCode problems** (70% acceptance); strong grasp of DSA patterns.
- First Prize**, Riviera 2025; **Finalist**, Aagaaz 2024 (IIT Bombay).
- Best Writer & Director**, Saarang 2025 and Drama League 2024 respectively.
